PLUGGER

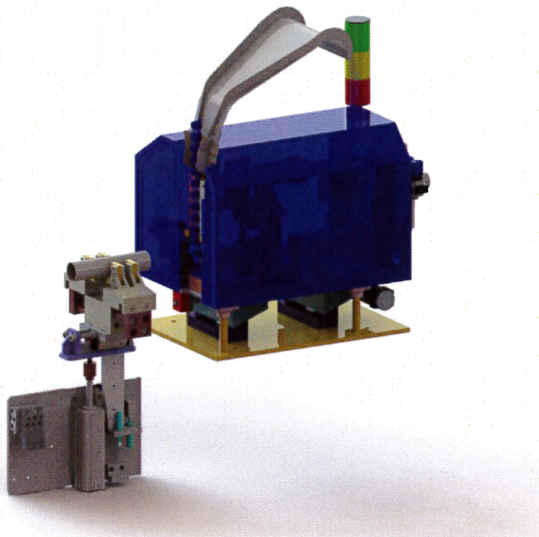

- cost saving
- quick
- efficient

PLUGGER is a fully automatic tube plugging system with many advantages. The plugs used in the system are delivered joined together as a plug band. Thus no stoppages occur as a result of plugs falling to the ground.

This obviously saves costs and provides you with a high productivity. The plugging operation is very quick, with a cycle of 2 sec's. Every plug is made with a small handle facilitating easy removal, either automatically or by a pair of tongs.

*The machine is constructed of well-known standard components. Compressed air: 6bar/100 psi
Dimension of machine: L 570 x W 400 mm*

Material plugs: Polyethylene
Standard colour: RAL 5010 blue
The plugs are delivered on plastic bobins (Ø 400 mm) made from environment friendly plastic.

The products and specifications are subject to alteration without notice.

Plugger Nr.	ca mm.	Cover Ø
3/2	2.9-3.4	6
3	3,2-4,6	6
4	4,2-6,5	7
5/4	5.8-7.8	10
5	6.3-9.0	10
6	8.8-11.5	12
7	11.0-14.0	15
8	13.5-17.0	18
9	16.0-20.0	21
10	20.0-25.0	26
11	24.0-27.0	28
12/11	28.0-32.0	32
